

Web Development

<http://ml-lab-4d78f073-aa49-4f0e-bce2-31e5254052c7.ukwest.cloudapp.azure.com:49461/login.php>

HTML

Each page is made in plain HTML

CSS

Have used a Bootstrap library, and proper CSS

PHP

Plain PHP is used in my Project

Secure sessions and cookies

Cookies and session are implemented and used correctly

Java Script

I have used JQuery library for my JavaScript scripts

AJAX

Jquery also helped me use AJAX

WebService

I did not understand that part of the project, and I have not used the Webservice API

Security is implemented

Salt and pepper are used for saving passwords in database

HTTPS is enabled, it can work fine online

I left additional comments in my source code
